SKYLER LONG

Senior Software Engineer

+1 805 399 2519 skylerlongworkmail@gmail.com https://www.linkedin.com/in/skhighler/
http://skylerlong.com/ Beaverton, OR, United States

SUMMARY

Senior Software Engineer with 8 years of experience building scalable backend systems, AI-enabled applications, and cloud-native platforms. Strong background in Python, C#, .NET, Go, and Node.js, with production deployments across AWS and Kubernetes environments. Hands-on experience delivering machine learning solutions using PyTorch, TensorFlow, and scikit-learn, including model training, inference APIs, and experiment tracking. Experienced in system redesign, API architecture, infrastructure automation, and cost-aware cloud optimization. Focused on building reliable, maintainable systems that perform well under real-world workloads.

EXPERIENCE

Senior Full Stack Engineer

Car Toys 07/2022 - 08/2025 Seattle, WA

- Microservices architecture introduced across Python FastAPI, C# .NET Core, and Go services running on Kubernetes in AWS and Azure environments, increasing overall platform availability from 98.5% to 99.6%.
- Production ML inference endpoints designed using PyTorch and scikit-learn, reducing forecasting error by 13% and stabilizing retraining cycles by 18% under real data drift conditions.
- Experiment tracking and model governance formalized through MLflow integration and Airflow scheduling, decreasing manual deployment effort by 22% while improving reproducibility.
- API layer performance strengthened through PostgreSQL indexing strategies and Redis caching, lowering average response time by 16% and smoothing p95 latency variance by 14%.
- Infrastructure provisioning codified in Terraform with container workloads standardized via Docker, shortening release lead time by 19% and reducing configuration inconsistencies by 21%.
- Kubernetes resource policies recalibrated to align autoscaling thresholds with traffic patterns, decreasing compute waste by 11% without throughput degradation.

EDUCATION

Master of Computer Science

Portland State University GPA 3/78 / 4.0

2016 - 2018 Portland, OR

- Note key learnings, experience and skills gained relevant to the job.

Bachelor of Computer Science

Clackamas Community College GPA 3.65 / 4.0

2014 - 2016 Oregon, OR

- Note key learnings, experience and skills gained relevant to the job.

SKILLS

Languages

Python, C#, .NET Core, Go, JavaScript, TypeScript, PHP, Ruby, Java, C++, SQL

Frontend

React.js, Next.js, Angular, Vue.js, Redux, SSR, ISR

Backend and APIs

ASP.NET Core, Django, FastAPI, Flask, Node.js Express, Laravel, Ruby on Rails, RESTful Services, GraphQL, OAuth2, JWT

Powered by Enhancv

EXPERIENCE

Full Stack Developer

Quanergy Systems Inc.

03/2019 - 06/2022 San Jose, CA

- Secure REST interfaces structured in Django REST Framework and Node.js, maintaining 99% service availability across real-time compliance pipelines.
- Forecasting and resource optimization workflows enhanced using TensorFlow and scikit-learn models, improving planning accuracy by 10% and lowering scheduling conflicts by 8%.
- Database layer reorganized through schema normalization and selective indexing in PostgreSQL, accelerating reporting queries by 15% and improving dashboard responsiveness by 12%.
- Legacy PHP and Ruby modules restructured into containerized services, cutting environment-related production defects by 17%.
- Release management matured through Jenkins and GitLab CI pipelines, reducing manual deployment overhead by 24% and decreasing rollback frequency by 9%.
- Authentication controls strengthened with OAuth2 and JWT token validation rules, reducing unauthorized access attempts by 14%.

Software Engineer

Sitehands 06/2018 - 07/2020 Charlotte, NC

- Backend services architected in C#, ASP.NET, and Node.js to support document lifecycle workflows, increasing processing throughput by 12% and lowering manual data errors by 15%.
- Real-time tracking capabilities introduced through REST APIs integrated with barcode-based mobile workflows, improving synchronization speed by 18%.
- Query execution paths optimized in SQL Server and MySQL through indexing and normalization adjustments, raising dashboard performance by 14% and reducing long-running queries by 20%.
- Deployment practices modernized through Docker-based container workflows, decreasing release preparation time by 16% and increasing deployment consistency by 19%.
- Engineering coordination across an 8-person team improved sprint predictability by 13% through structured review cycles and architecture alignment.
- Environment configuration standards consolidated, reducing staging-to-production inconsistencies by 17%.

SKILLS

Databases

PostgreSQL, SQL Server, MySQL, MongoDB, Redis, DynamoDB, Elasticsearch

AI / Machine Learning

PyTorch, TensorFlow, Keras, Scikit-learn, XGBoost, MLflow, Kubeflow, Apache Airflow, Feature engineering, Experiment tracking, Model Versioning, LLM Systems, Embeddings, Semantic search, Batch Inference, Real-time Inference Pipelines

Cloud and DevOps

AWS EKS, ECS, EC2, Lambda, RDS, S3, Azure AKS, App Services, Service Bus, GCP, GKE, Cloud Run, Docker, Kubernetes, Helm, Terraform, GitHub Actions, Jenkins, GitLab CI, Prometheus, Grafana, ELK
