SKYLER LONG

Senior AI Systems Engineer | ML Ops, Claude (LLM), Kubernetes, AWS, Salesforce Automation

longskyler528@gmail.com https://www.linkedin.com/in/skhighler/ https://skylerlong.vercel.app/

Beaverton, OR, United States

SUMMARY

Senior AI Systems Engineer with 8+ years of experience delivering production machine learning systems, LLM integrations, RAG pipelines, Salesforce automation, and cloud-native infrastructure. Specialized in Python, FastAPI, Node.js, React, Kubernetes, AWS, ML Ops, statistical modeling, and event-driven automation. Proven track record of improving forecast accuracy, reducing latency, increasing system availability, and automating enterprise workflows.

EXPERIENCE

Senior AI Systems Engineer | ML Ops, Claude (LLM), Kubernetes, AWS, Salesforce Automation

Car Toys 07/2022 - 08/2025 Seattle, WA

- Engineered a production sales forecasting system in Python using scikit-learn and PyTorch, implemented time-series feature engineering, deployed FastAPI inference services on AWS EKS, and improved forecast accuracy by 13% under live data drift.
- Integrated Claude APIs into FastAPI and Node.js services, structured prompt templates with validation logic, implemented retry handling, and deployed the service in Kubernetes for internal sales and inventory intelligence.
- Implemented RAG pipeline by generating embeddings, performing semantic similarity search, and injecting contextual data into Claude prompts for AI-powered internal knowledge retrieval.
- Configured Zapier, n8n, and Make.com automation workflows to consume webhook events, automate lead routing, dispatch notifications, and eliminate manual CRM processes.
- Containerized ML services using Docker, implemented MLflow experiment tracking and Airflow orchestration, tuned Kubernetes autoscaling, increased availability from 98.5% to 99.6%, and reduced compute waste by 11%.
- Delivered React-based forecasting dashboards connected to FastAPI and Node.js APIs, optimized PostgreSQL indexing and Redis caching, and reduced production API latency by 16%.

EDUCATION

Master of Computer Science

Portland State University

GPA 3/78 / 4.0

2016 - 2018

Portland, OR

Bachelor of Computer Science

Clackamas Community College

GPA 3.65 / 4.0

2014 - 2016

Oregon, OR

SKILLS

Programming & Application Development

TypeScript, Python, JavaScript, TypeScript, C#, FastAPI, Django REST Framework, Node.js, .NET Core, React, AngularJS, REST APIs, Microservices Architecture

Powered by Enhancv

EXPERIENCE

Full Stack & Machine Learning Engineer | Django, React, Node.js, Real-Time Analytics, CI/CD

Quanergy Systems Inc.

03/2019 - 06/2022 San Jose, CA

- Built real-time analytics APIs using Python (Django REST Framework) and Node.js, optimized PostgreSQL schemas, and maintained 99% uptime under compliance workloads.
- Developed React-based dashboards with dynamic visualization components and API polling mechanisms for near real-time reporting.
- Integrated scikit-learn and TensorFlow models into backend inference services, engineered feature pipelines, and improved planning accuracy by 10%.
- Refactored legacy PHP and Ruby modules into Docker-based microservices, reduced environment-related defects by 17%, and standardized deployment workflows.
- Implemented CI/CD pipelines using GitHub Actions and Jenkins, automated container builds and deployments, and reduced manual release effort by 24%.
- Strengthened API security using OAuth2 and JWT authentication to improve compliance and reduce unauthorized access.

Full Stack Software Engineer | Node.js, React, AngularJS, SQL Optimization, Docker

Sitehands 06/2018 - 07/2020 Charlotte, NC

- Developed backend services using Node.js (Express) and ASP.NET for document lifecycle and barcode-based tracking systems.
- Maintained React and AngularJS dashboards connected to REST APIs to support workflow visibility and document status tracking.
- Optimized SQL Server and MySQL queries through indexing and normalization, reducing long-running queries by 20%.
- Improved document processing throughput by 12% by refactoring backend logic and batching operations.
- Introduced Docker-based deployment processes, reduced environment inconsistencies, and improved release stability by 19%.
- Implemented scheduled Node.js jobs to automate document state transitions and reduce manual processing.

SKILLS

Machine Learning, LLM & RAG Systems

Vue.js, scikit-learn, PyTorch, TensorFlow, Statistical Modeling, Time-Series Forecasting, Feature Engineering, Model Evaluation, Claude API Integration, Prompt Engineering, RAG, Embeddings, Semantic Similarity Search

Cloud, ML Ops & DevOps

ASP.NET Core, AWS, Kubernetes, Docker, Terraform, MLflow, Apache Airflow, Model Versioning, Batch & Real-Time Inference Pipelines, CI/CD, GitHub Actions, Jenkins, IaC

Automation, Data & Enterprise Integration

Zapier, n8n, Make.com, Webhooks, Event-Driven Architecture, Salesforce Sales Cloud, Salesforce Service Cloud, OAuth2, CRM Synchronization, PostgreSQL, Redis, SQL Server, MySQL, Query Optimization, Prometheus, Grafana
